

### Proposed 2019 - 2020 FYE Budget Summary

#### Attachment A

### **Major Assumptions**

#### Revenues

1) No per unit fee increase is proposed for groundwater and base fees for FY20. Overall, fees decrease by approximately \$5,300. Some agencies will experience a fee increase. Each agencies FY20 fee is different depending upon their groundwater use and number of connections.

66,614

- 2) Groundwater fees reflect decreased pumping.
- 3) Base fee are not projected to increase for FY20. The base fee should cover approximately 40% of costs.
- 4) Assumes 5 year acre foot average groundwater pumped of:
- 5) A new grant for SGMA actions, including GSP Development started in FY19.
- 6) Interest income has increased as rates have slightly increased.

#### Expenses

- 1) Staffing costs includes partial use of the Project Assistant. Total 2.2 FTEs allocated to SGA. Staff pays their entire 7% of their employee share of pension plan contributions. Overall staffing costs also budgeted for a 4% merit and 2% cola increase and follows the compensation policy.
- 2) Benefits include employer PERS, medical, vision, dental, disability insurance, OPEB and workers' compensation for 2.2 FTEs. FY 2020 budget anticipates an increase in medical costs of 7%, other costs at 3% and specific increases to OPEB costs. Employees pay their entire 7% of their employee portion of PERS pension.
- 3) SGA continues to budget for additional payments towards its unfunded pension plan. A CalPERS July 26, 2018 letter estimates the June 30, 2019 balance at \$56,500 at a 7.0% discount rate. This balance includes additional \$47,500 payment made towards this liability during FY19. This budget spreads out payment of the unfunded liability over 4 years versus 30 years as done by CalPERS.
- 4) Professional fees include public relations, human resources, audit, accounting, actuarial, and legal expenses. It also includes higher actuarial costs due to OPEB rule changes.
- 5) Program consultants for FY20 includes updating the basin management report, monitoring water quality levels, groundwater management plan, maintaining the data management system, regional contamination issues, grant application assistance, and groundwater modeling.
  - FY19 and beyond also represents some initial increased costs for newly passed legislation related to the Sustainable Groundwater Management Act.
- 6) Special projects reflects the costs associated with the DWR grants related to the SGMA.
- 7) Leasing costs began increasing in FY19 due to a renegotiation of the lease on the Birdcage building.
- 8) General cost increases were projected at 3% unless specific cost increases could be identified.

#### Expenses in Excess of Fees

1) In FY20, it is anticipated that SGA fees will be approximately \$82,050 less than expenses. Expenses in excess of fees will be mainly funded from designated funds and the balance from non-designated funds accumulated from previous years.

#### Designations/Restrictions

- 1) Excluding any SGMA costs, the Operating fund is projected to be approximately eight months for FY20, which exceeds policy guidelines. The expected non-designated cash at the end of FY19 will be used to fund expenses and therefore a rate increase for FY20 is not needed.
- 2) The remaining groundwater modeling designation of \$148,300, the update GSP designation of \$50,000, and maintaining the DMS designation of \$10,000 (totaling \$208,300) from FY19 will move to the SGMA implementation designation to pay for SGMA costs in FY19 and FY20. An additional \$54,400 from the program budget in FY19 will be designated for the SGMA costs to be spent in FY20 and beyond. Approximately a net \$25,500 of this designation is used in FY19, leaving a combined remaining designation balance in FY19 of \$237,200.
- 3) Office equipment designation in FY19 is a result of unused office move costs in FY18 that will be used for office/conference room improvements.

#### FY21 and Beyond

1) Currently, a projected increase of approximately 4.5% is anticipated in FY21. Future increases will be higher than actual expense increases to balance out the fees and expenses over time.

- SGA general assessment fees methodology splits the fee into two parts: a base fee based upon the number of connections per agency and a per acre foot fee based upon a trailing five-year average volume of groundwater pumped. This portion represents the per acre foot fee component. Overall, SGA is proposing to not increase per unit fees. Since groundwater pumping has decreased from the previous year, overall fees have decreased from the prior year. The groundwater per unit fee is proposed to stay as the same as FY19 at \$6.00 in FY20. A trailing five-year pumping average is used (FY14-FY18). FY19 through FY23 pumping extraction reflects members estimates provided to SGA using expected wet year data. As the amount of acre-feet pumped declines, revenues will decline, even though operations are independent of groundwater pumping. Consequently, the fee per acre feet must increase to continue to pay for existing services.
- SGA total base fees are calculated using the number of connections per agency, plus a minimum base fee. The proposed base fee is to be calculated as follows: a minimum base fee of \$10,100 plus \$1.31 per connection for connections in excess of 6,000. For each subsequent year, the base fee is set to increase as the overall expenses increases, exclusive of special project costs as these can vary year to year. The share of fees paid for by base fees may need adjusting from time to time to achieve or target 40% fees supported by base fees.
- 3 The overall fee change from the previous year is the total fee change. Each individual agencies change will be different and may be less or more than the overall change due to changes for individual groundwater acre feet pumping averages and number of connections.
- 4 The expenses increase for FY20 from FY19 is anticipated at approximately 8.67%. SGA is funding approximately \$47,200 in SGMA expenses in FY20 that are being designated in FY19. The overall expense change from the previous year is calculated as follows: the year to year difference in total expenses which include staff, office, and professional fees. The calculation does not include special project expenses and one time expenses.
- 5 SGA received a new grant from DWR for SGMA actions, including GSP development and should be completed by the end of FY21. SGMA partner fees are collected from the other four Groundwater Sustainability Agencies in the North American Subbasin to assist in funding the consultant work to complete the SGMA program activities.
- 6 Interest income from the SGA Local Agency Investment Fund (LAIF) account. As available cash decreases, interest earned is expected to decrease.

- For budget purposes, staff salaries include 50% of four full time positions, and 20% of the assistant project manager or a total of 2.2 FTEs. Salaries reflect the compensation survey amounts approved by the RWA Board, reflecting a potential 4% increase in merit and 2% for COLA. Also includes approximately \$10K in overlapping salary and benefit costs for the finance manager position. Salaries do not reflect any changes for the new ED or for the new finance manager.
- 8 Benefits include employer PERS, medical, vision, dental, disability insurance, OPEB and workers' compensation for staff members. FY 2020 budget anticipates an increase in medical costs of 7% and other costs at 3%. In FY19, classic employees began paying their entire 7% share of CalPERS contribution.
- 9 Represents the estimated payment of the allocated unfunded pension liability to SGA over four years at an estimated 7.0% discount rate. A July 26, 2018 CalPERS letter estimates the unfunded liability balance of \$56,500 at June 30, 2019. Since this liability is being paid over a shorter time frame of 4 years, SGA can expect swings, both positive and negative as the liability is recomputed to reflect the actual results compared to assumptions.
- 10 Payroll taxes for five staff members (2.2 FTEs).
- 11 Includes meal costs. Also includes conference attendance and the associated travel costs (transportation, lodging, meals).
- 12 Includes computer training and other professional development classes.
- 13 In accordance with the building rental lease. RWA's lease includes full use of the Board room. The RWA Board approved a new lease on the Birdcage building on January 11, 2018. The new lease began in August 2018. The first two years the lease will be \$1.00 SF and the last three years will be \$1.10 per SF with an option for a two-year renewal at \$1.15 square foot.
- 14 Increase in costs for property and liability coverage obtained through ACWA JPIA forecasted for the coming year. SGA experienced a slightly higher than expected coverage cost in FY19.
- 15 Includes costs for office maintenance needs.
- 16 Reflects mailing activities and cost of postage machine rental.
- 17 Includes telephone and conference call costs, web hosting for the website and internet service costs.
- 18 Miscellaneous meeting charges including food/refreshments.
- 19 Includes printing costs for letterhead. Also includes copier maintenance and copier lease costs.

- 20 Major cost component is ACWA dues. Other dues include AWWA, Groundwater Resources Association, Water Education Foundation and Sacramento Metro Chamber of Commerce. Subscriptions include Business Journal.
- 21 Acquisition of new hardware/software to replace aging and out-of-date components.
- 22 General computer maintenance service includes cloud back up for more security and should reduce downtime if something happens to the server.
- 23 Legal expenses in support of general SGA board meetings, resolutions, regulatory analyses, services related to contracts, and GMP development. Legal fees are projected to be higher due to the implementation of SGMA.
- Audit fees are set by the awarded proposal. A new contract with Gilbert Associates started in FY19. The audit costs shown as quoted for five years.
- 25 Payroll service costs for 5 employees (2.2 FTE).
- 26 Represents actuarial, budgeting and accounting assistance, website, and human resource/recruiting support.
- Fees for groundwater management program implementation. (See separate program consulting budget). Unused program budget expenses in FY19 of \$54,400 will be designated for the SGMA cost share.
- 28 Program FY16, FY17, and FY18 represents unused funds for these fiscal years which will be used in FY19 and FY20 for the SGMA cost share. For FY19, approximately \$54,400 in unused program implementation funds will be designated towards SGMA to be used in FY20.
- 29 Anticipates a possible replacement of the server in FY22. RWA has signed a new lease on the Birdcage building. SGA used part of the money in FY18 and FY19 that was budgeted for the move for office improvements. The balance of the costs will be funded by the office equipment designation. See note 39.
- 30 Consulting expenses for grant-funded SGMA actions, including GSP development. Matching funds to pay for costs also come from SGA and SGMA partners.
- 31 Total expenses for SGA.
- 32 Represents the difference between total monies received versus total expenses incurred during the year.
- 33 Beginning cash for FY19 is reduced by FY18 year end accounts payables and increased for FY18 year end accounts receivable to arrive at available cash.

- 34 Represents the operating fund designation to pay for operating expenditures. Per SGA policy #400.2, this fund range target is four to six months of operating expenses. Government Code Section 53646(b) (3) suggests that an agency should have sufficient cash flow to meet the next six months of budgeted expenses. Cash reserves can be used to pursue new grant opportunities unknown during the budget development. This calculation is based upon the ending cash in bank. It does not include special project expenses funded by grants or one time expenditures.
- 35 CalPERS provides estimated unfunded liabilities for pooled agency members, such as SGA. SGA began making their share of the liability payment starting in FY17. The pension plan assignment had set aside amounts to make partial payments towards this unfunded pension liability in future years. SGA's estimated unfunded liability balance at June 30, 2019 is approximately \$56,500 reflecting the liability discounted at 7.0%. This estimate was based upon the CalPERS communication letter reflecting the most recent payment of \$47,500 in FY19. Since SGA now budgets an annual payment towards the unfunded liability, SGA will not also set aside an assignment for these ongoing payments.
- 36 SGA designated a total of \$208,300 from the FY16, FY17 & FY18 budget for groundwater modeling, updating the GSP, and maintaining the DMS for FY19 with approximately \$25,500 used in FY19. These designations will now move to the SGMA designation to fund the SGMA Cost Share to be spent in FY19 and FY20. For FY19, SGA will also designate approximately \$54,400 of unused program costs towards the SGMA to be spent in FY20. These total approximate remaining funds of \$237,200 will allow SGA to meet its cost share with the other NASb GSAs. The cost share is required to receive a \$994,276 grant from the Sustainable Groundwater Planning Grant Program to help fund the required groundwater management components resulting from SGMA. Among the required components is development of a NASb groundwater model, a NASb groundwater database, installation of monitoring wells and monitoring equipment, groundwater quality sampling, and preparation of a GSP by January 31, 2022.
- 38 Amount of cash over and above designation policy "undesignated cash."
- 39 Carry over funds from FY18 that were budgeted for office move costs. These funds will be used towards office improvements.

(1) Assumes 5% annual increase in consulting labor costs.

(2) Approved FY19 designation total amount of \$208,300 included in SGMA cost share job report in FY19.
(3) Unused FY19 funds from GSP, DMS, Regional Contamination and Groundwater Modeling are designated to FY20 for SGMA cost share.

- SGA had traditionally prepared a biennial Basin Management Report as part of its Groundwater Management Program. The 2014 Sustainable Groundwater Management Act (SGMA) will require annual reporting. For FY20, SGA anticipates a report for the SGA area only. Beginning in FY21, an annual budget is assumed to pay for SGA's portion of an annual report for the North American Subbasin (NASb).
- 2 SGMA requires a Groundwater Sustainability Plan (GSP) for the NASb be submitted by January 31, 2022. In anticipation of preparing a single GSP with the other NASb Groundwater Sustainability Agencies (GSAs), SGA has been collecting funds for its contribution to funding the effort. For FY18, \$50,000 was designated into FY19, and an additional \$20,000 budget was proposed to commence work on GSP development in FY19. This \$20,000 for FY19 has been set aside for SGMA spending in FY20. Funding is also being identified in the out years to prepare for any unforeseen expenses related to GSP development.
- 3 This funding is to respond to any monitoring needs for issues that emerge of a regional interest during the course of the fiscal year.
- 4 This money is for consulting assistance in preparing grant applications and other funding requests. In FY18, funds were used for a successful application to the Sustainable Groundwater Planning Grant Program.
- 5 Consulting support to enter data and perform maintenance on the Data Management System (DMS). SGMA requires development of a common database for the NASb, so FY18 funds were designated as part of SGA's contribution to database development for the NASb. For FY19, \$5,000 is proposed for SGA's contribution to NASb database development, of which \$4,400 is being designated to FY20 towards the SGMA.
- 6 Much of this work has been assigned over to the RWA Regional Water Reliability Plan (RWRP), so no projected expenses are identified at this time.
- 7 This activity is currently coordinated through the SGA Regional Contamination Issues Committee, and the intent is to have the planning funded by responsible parties and will be coordinated with RWA IRWMP effort. These funds will allow for consultant staff to support meetings as needed on regional contamination such as the McClellan Stakeholder's Forum and the Regional Contamination Issues Committee. Unused FY19 funds will be designated to FY20 towards the SGMA funding.
- 8 SGMA will require additional modeling work in the NASb to determine the sustainable yield and water budget for the basin. SGA budgeting for a model update commencing in FY17. There were funds in the amount of \$98,300 that were designated and approved at the SGA board meeting on April 13, 2017 for FY18. For FY18, an additional \$50,000 was also budgeted. All of these funds, totaling \$148,300 were designated into FY19 with an additional \$20,000 budgeted for FY19. These funds plus the designated funds from updating the GSP and maintaining the DMS are needed for SGA's contribution to the NASb model development in support of SGMA for a total of \$208,300. The model update commenced in FY19. An additional \$54,400 of unspent funds from FY19 will be designated towards SGMA for FY20.
- 9 Subsidence monitoring is a required component of GSPs developed under SGMA. There are currently no projected expenses identified. Potential monitoring expenses will be identified during development of the NASb GSP.

Notes:

(1) Retail connections are based on SGA boundaries or service area boundaries that are dependent upon SGA for management of the groundwater basin. Information derived from

information collected from members and subject to refinement.

(2) Minimum base fee is set @ \$10,100 plus \$1.31 per connection for connections over 6,000. The base fee is set to increase annually by the overall percentage of expense increase for administrative costs. The groundwater fee is \$6.00 per AF.
