

Sustainable Groundwater Management Act Update

December 10, 2020

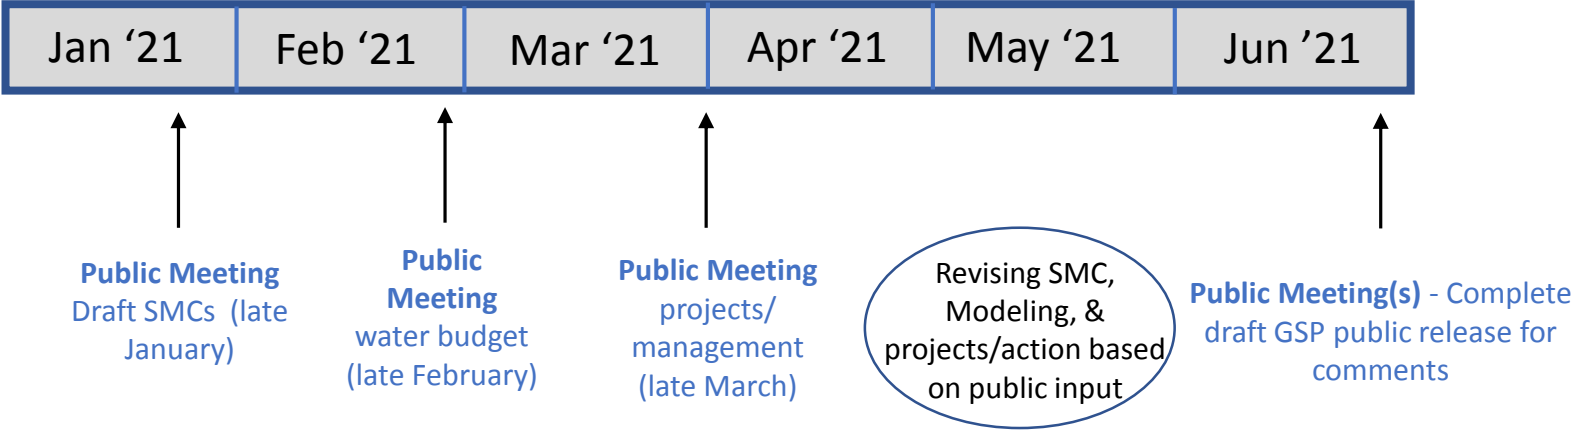

SGA

Current Status

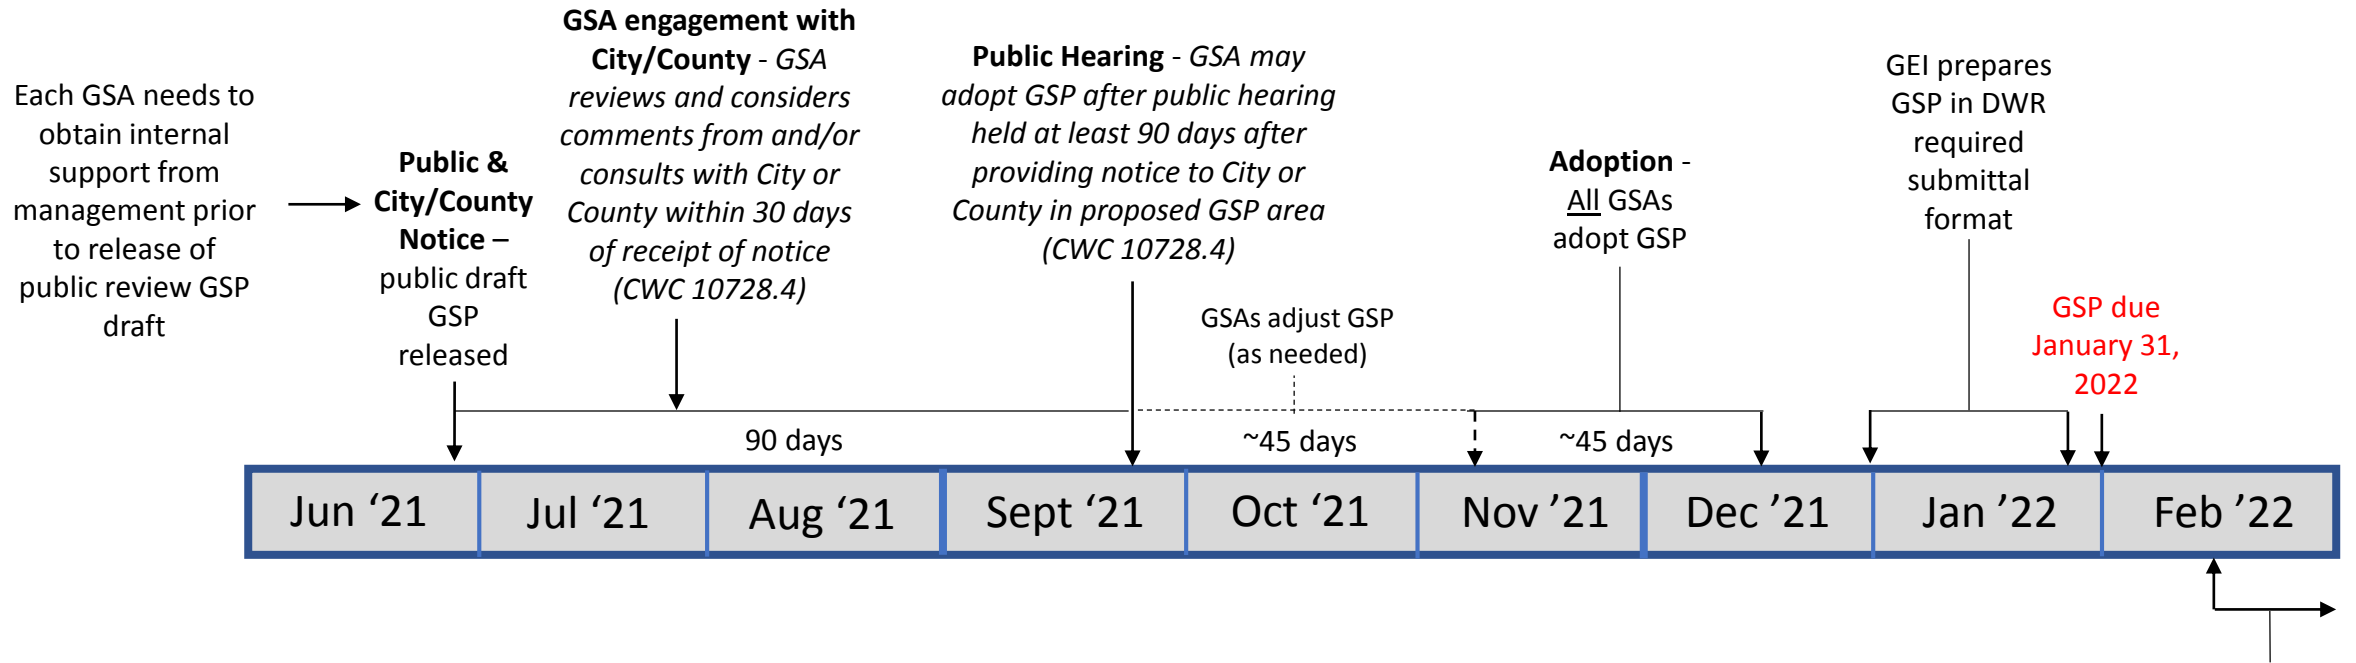

- Hydrogeologic Setting and Current Conditions released for review in early November
- Model extremely close to calibration, so current conditions water budget information available within next couple of weeks
 - Projected conditions still a couple of months away
- Good progress on developing approach to SMCs related to water levels
- Just starting on water quality related SMCs
- Beginning development of GSA Implementation Agreement

GSP Development and Public Engagement Timeline

DRAFT
Subject to change

GSP Public Release and Adoption Timeline

- DWR posts GSPs within 20 days
- DWR establishes 60 day or longer public comment period
