Potential Benefits to SGA

- Further improved ratio of technical to administrative staff
- Reduced staffing cost compared to current alternative
- Improved number of technical staff committed to groundwater management
 - Local knowledge and expertise should result in more effective long-term management of the SGA area
- Slight improvement to administrative staffing
- Coordinated SGMA implementation in NA and SA subbasins
 - Opportunities for sharing staff to accommodate temporary workload issues
- Improved regional coordination on GW banking and other issues

Governance Considerations

- SGMA requires management at subbasin level
 - American River is the boundary between SGA and SCGA
- SGA has existing contract with other GSAs in North American Subbasin
- SGA has well-established relationship with unique group of stakeholders in North American Subbasin
- SGA has unique funding mechanisms
- Potential modifications to governance would need to account for these issues to realize the potential benefits described above
